Can a lift change your life?

Unlikely!
is the an-
swer you
can expect
from anyone
who doesn't
have a lift
and hasn't

considered getting one. Absolutely! is the answer you will get from someone who has. Because they understand that a lift means so much more than just moving from floor to floor. It's about enjoying a better life, or holding on to the good things in life.

Like an older retired couple we know. They have been living in their house for 28 years, but now the stairs have become an insurmountable barrier that meant they were forced to sell their beloved home. But by chance they got to hear about Axess 2lifts. A lift that changed their lives and allowed them to remain in their home.

Or the couple in their forties who were at a trade fair hunting for new stairs for their house. As luck would have it they saw our stand with its home lifts – a world away

from stairs. A new concept and a solution they opted for on the spot!

Axess 2 is a family company that was founded in 2003. Since then we've grown to become one of the UK's leading home lift suppliers and installers. For a long while home lifts were something that only concerned the disabled, who naturally saw

A lift at home?
Really, are you
kidding me!

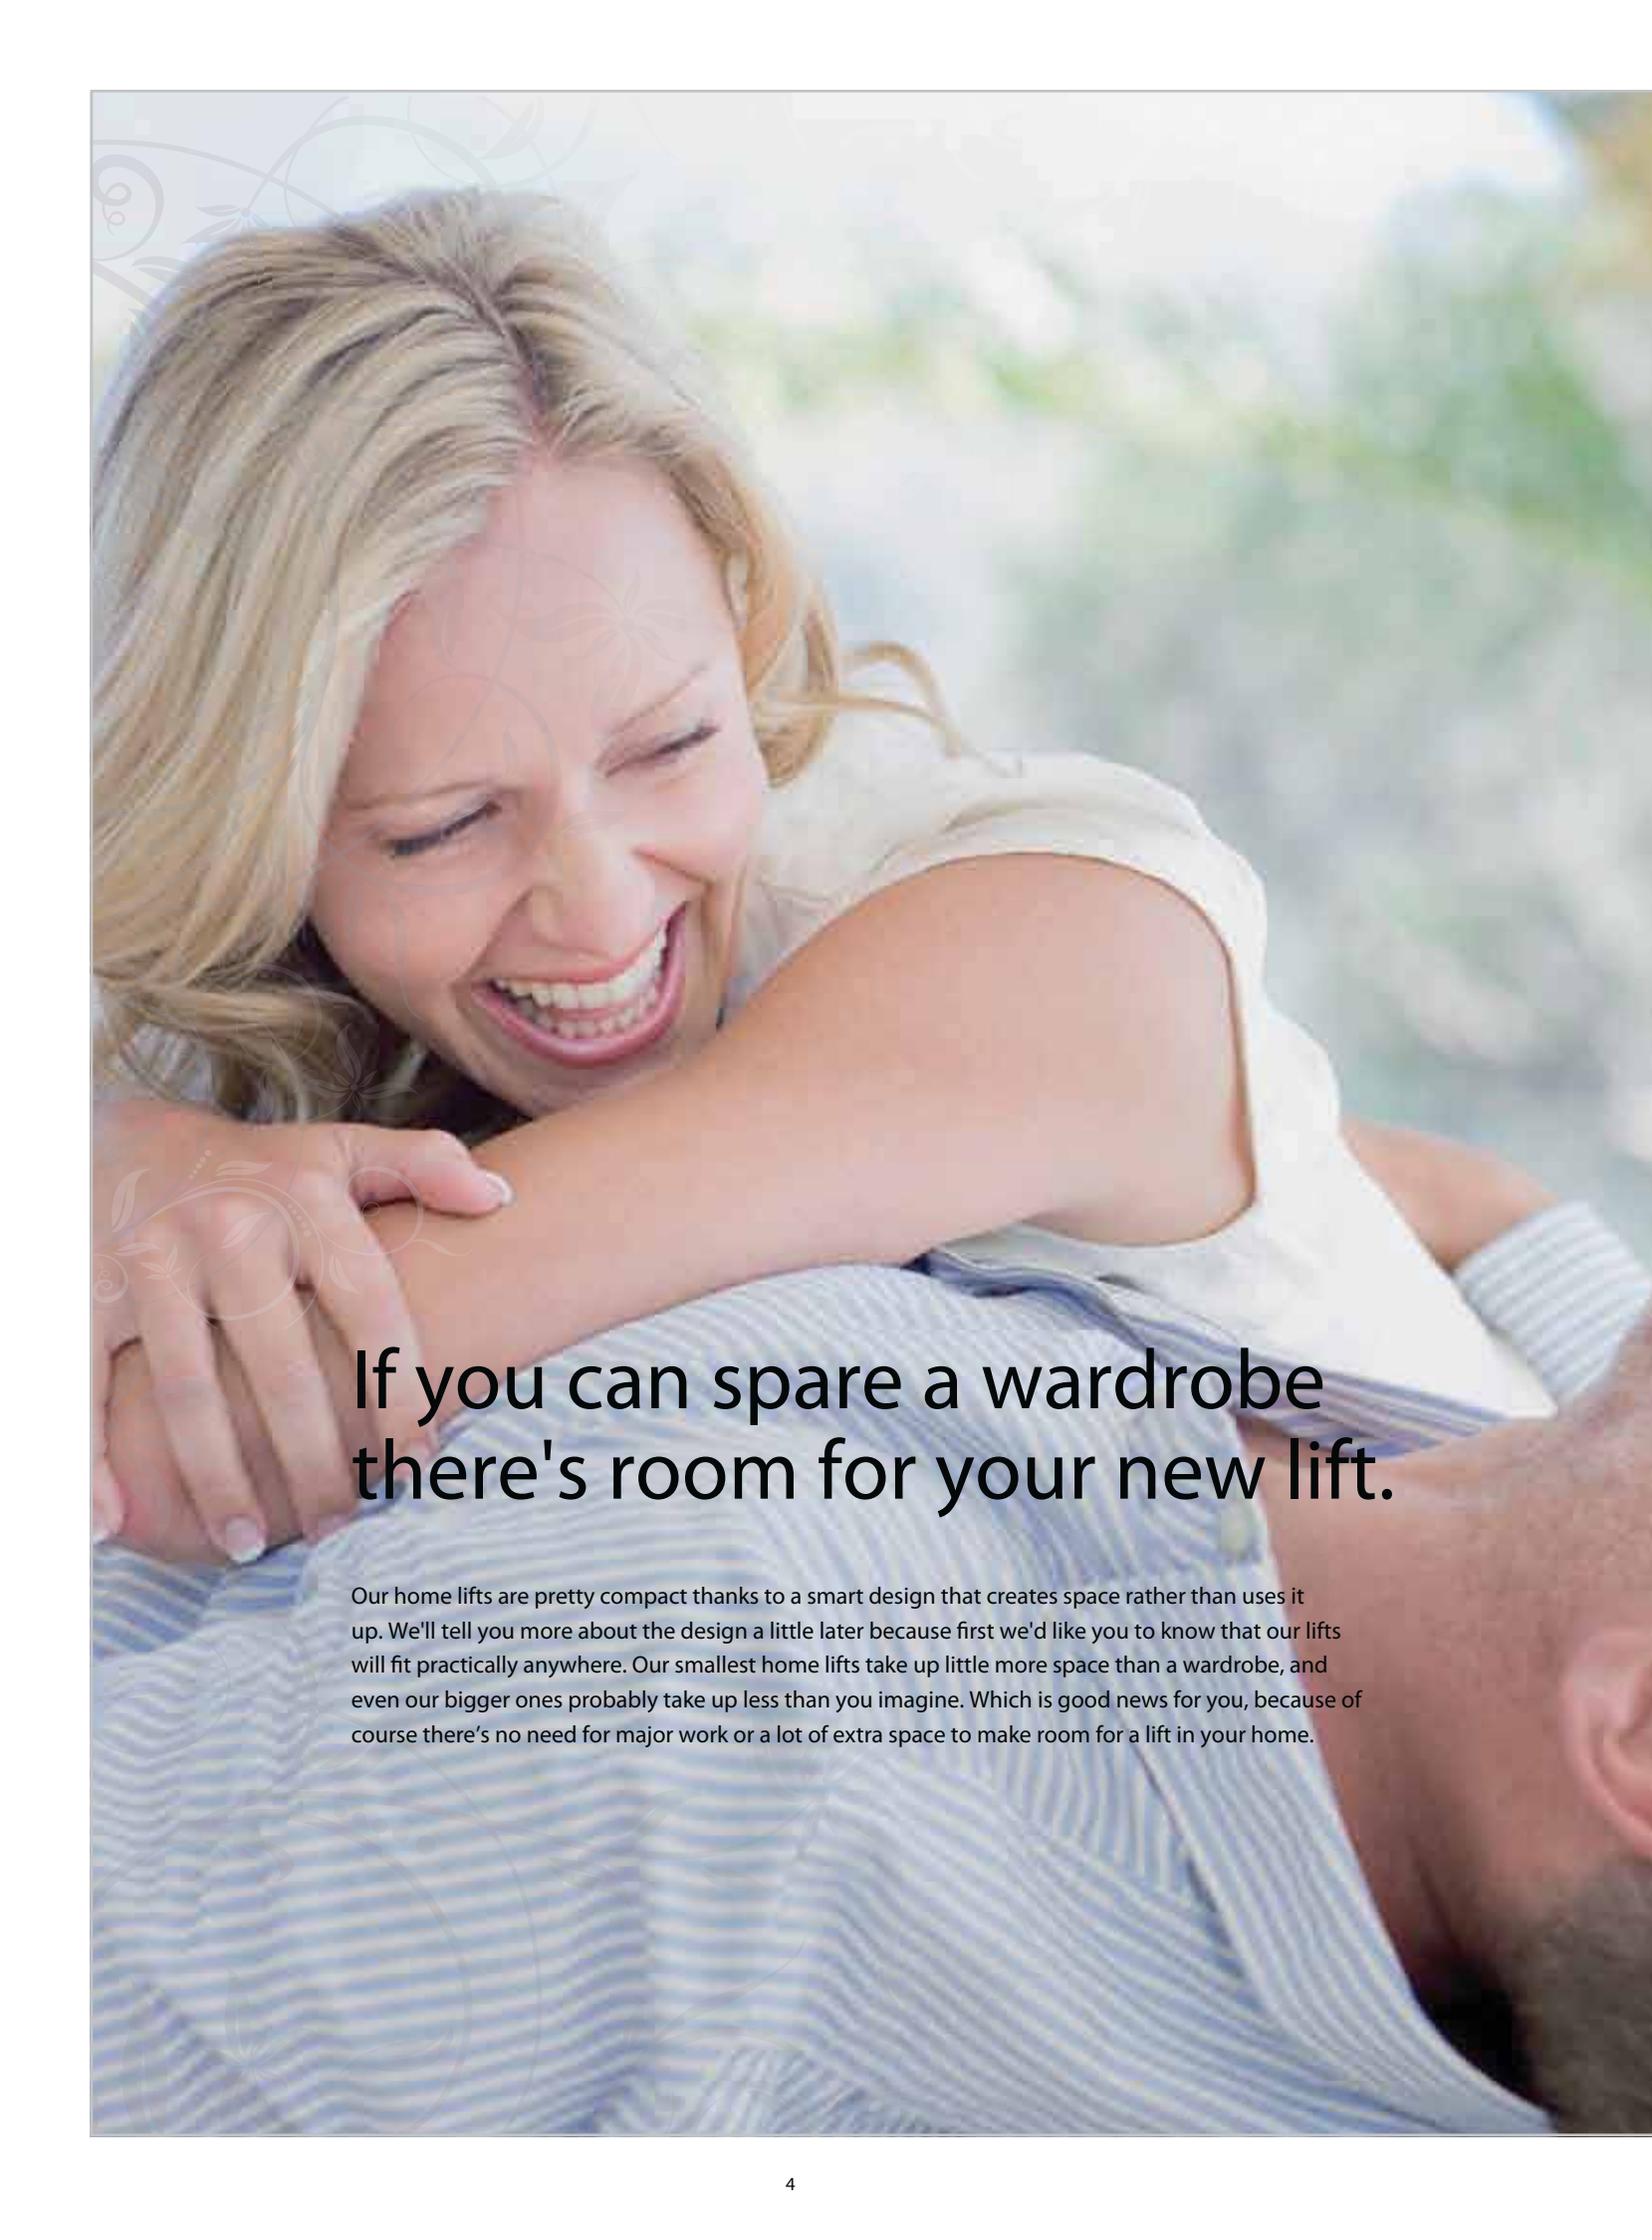

the advantages of having one – above all the ability and freedom of buying a new house. A lift provides freedom of choice where previously

floor plans and stairs had been a hinder.

More recently a new group has begun to buy home lifts – people who don't really need them. People who are not hindered by stairs, age or disability. Why? We may well ask. We think it's because our lifts have evolved from being a practical problem solver into a useful furnishing. A lift makes everyday life easier when you need it, and it adds a elegant touch to your home. Good design and styling also have the power to change life for the better.

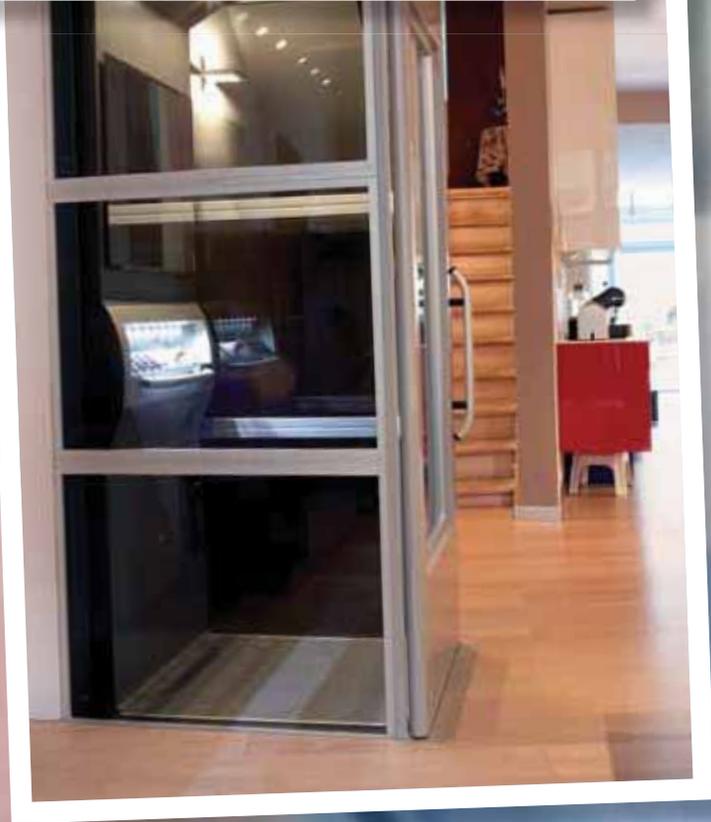

You can expect a warm welcome from us here at Axess 2. We know exactly what our lifts can do for you, and we're convinced you'll know pretty soon, too.

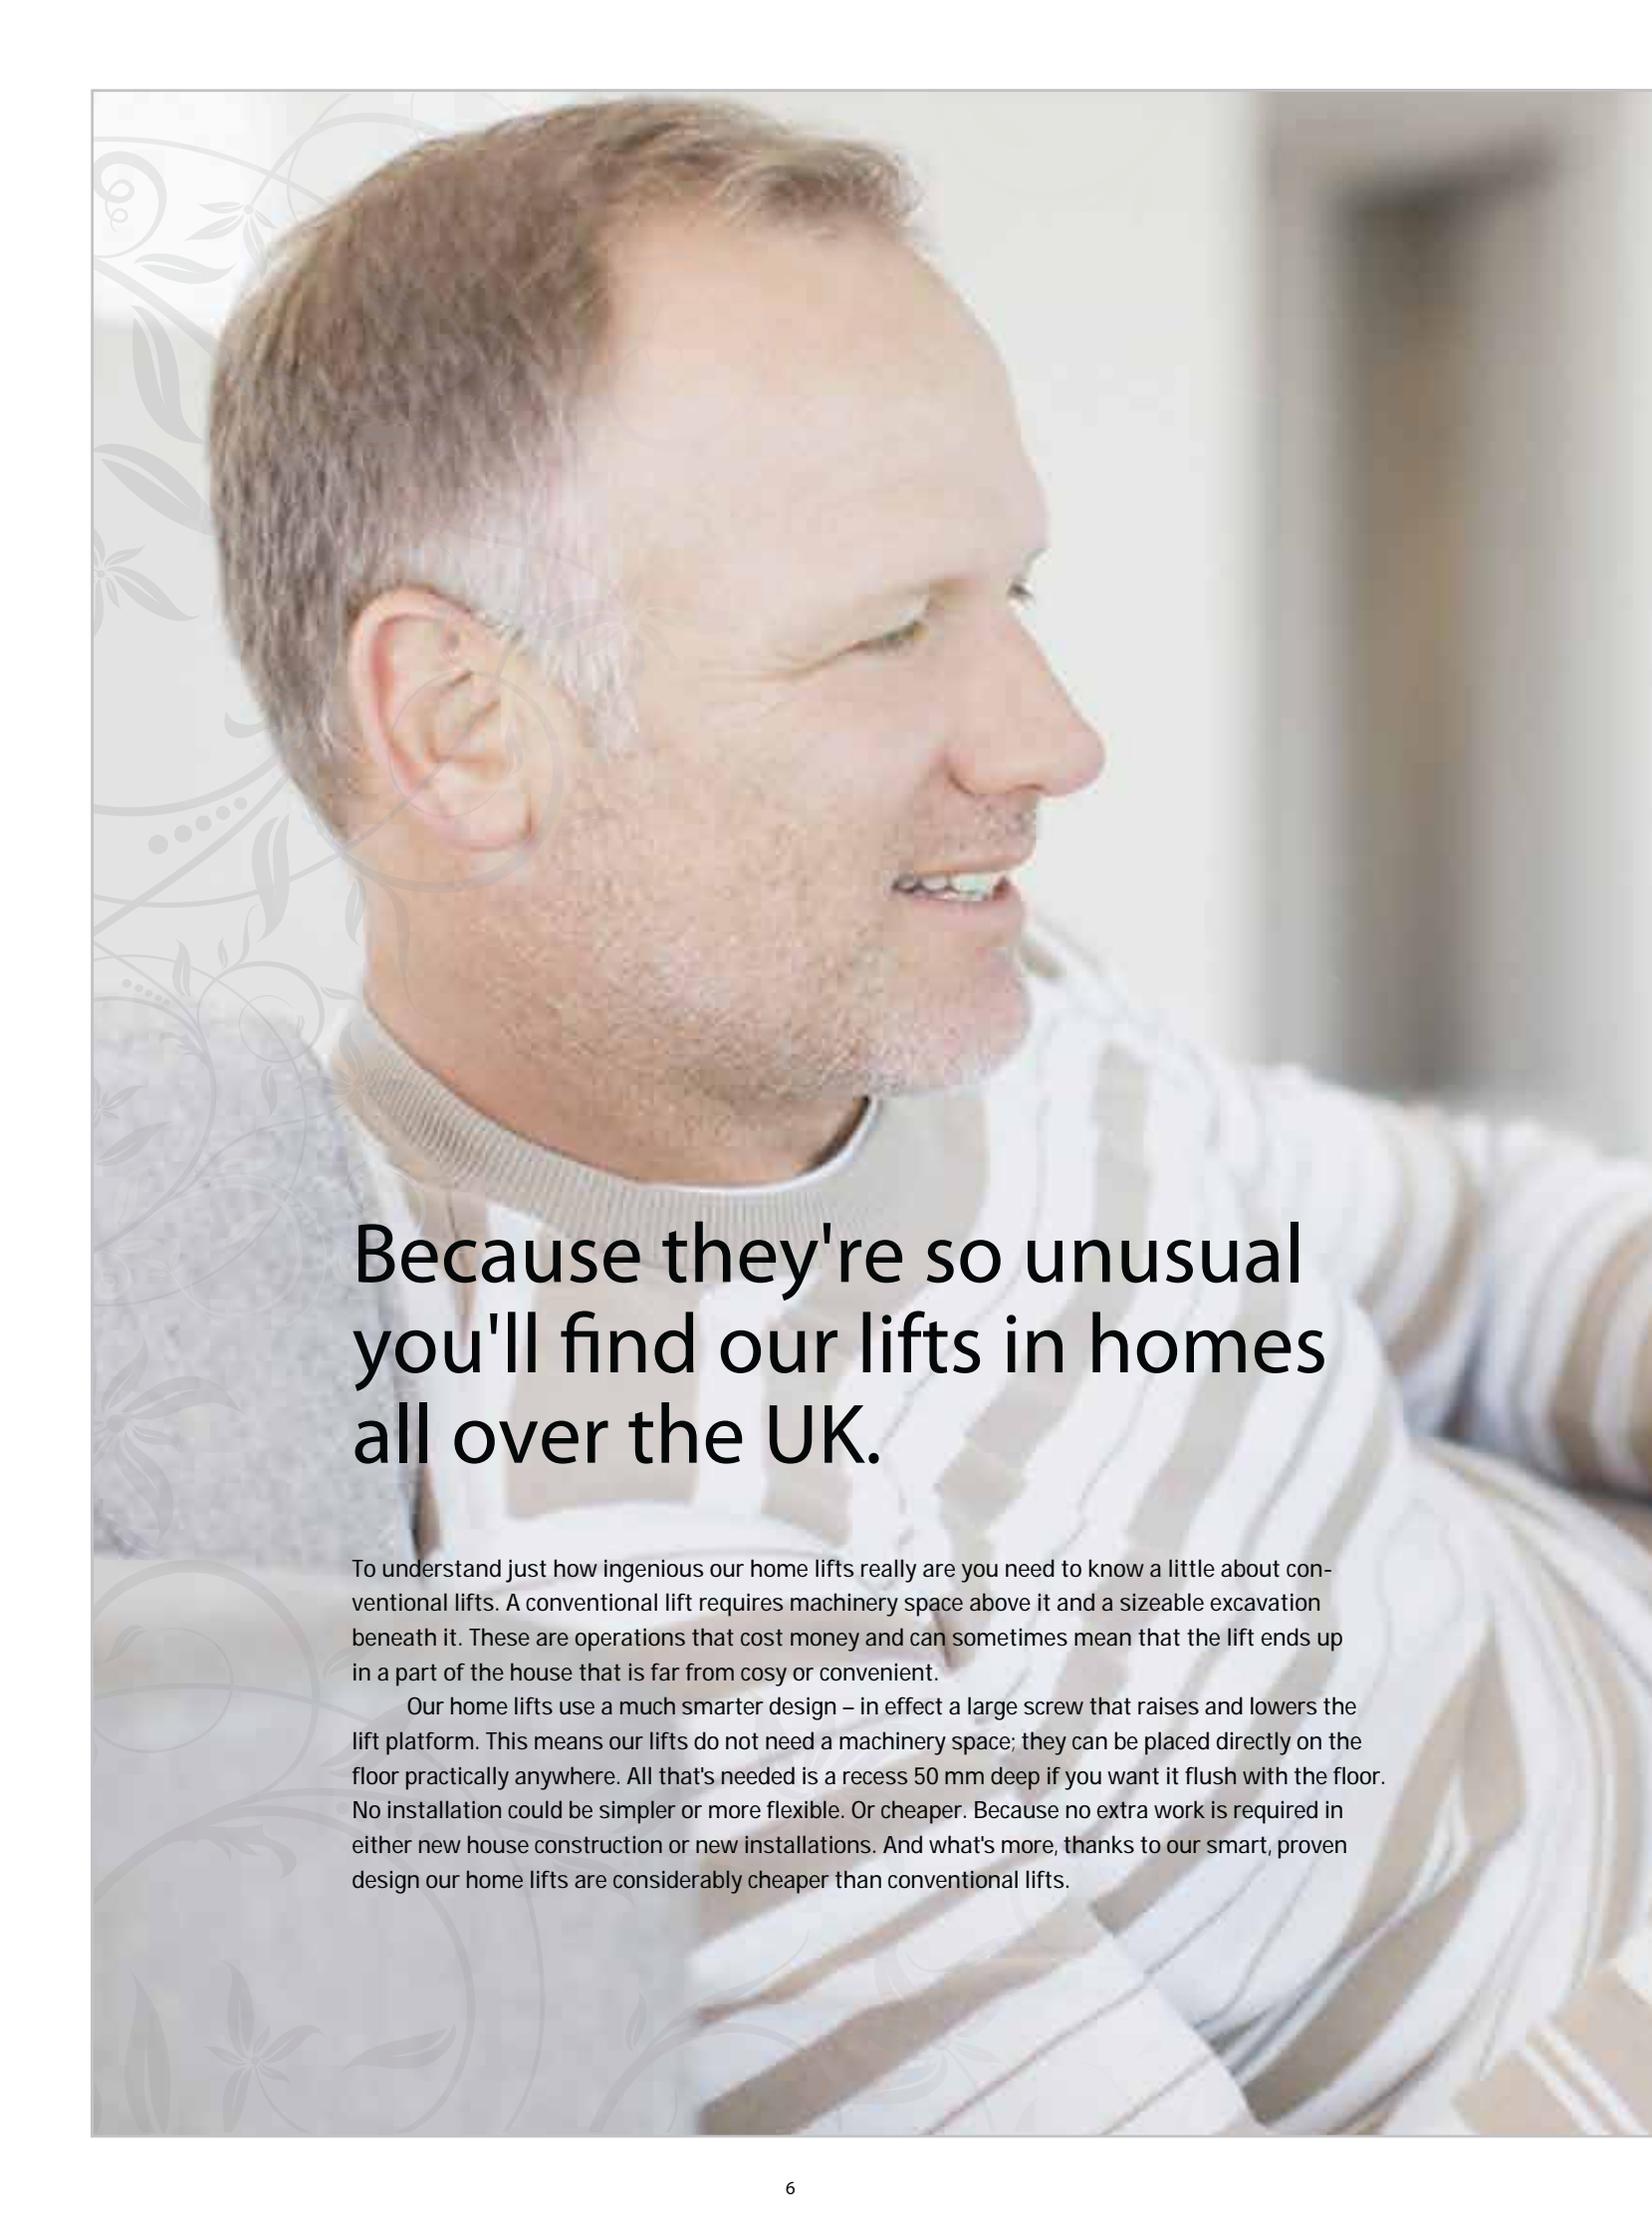

If you can spare a wardrobe there's room for your new lift.

Our home lifts are pretty compact thanks to a smart design that creates space rather than uses it up. We'll tell you more about the design a little later because first we'd like you to know that our lifts will fit practically anywhere. Our smallest home lifts take up little more space than a wardrobe, and even our bigger ones probably take up less than you imagine. Which is good news for you, because of course there's no need for major work or a lot of extra space to make room for a lift in your home.

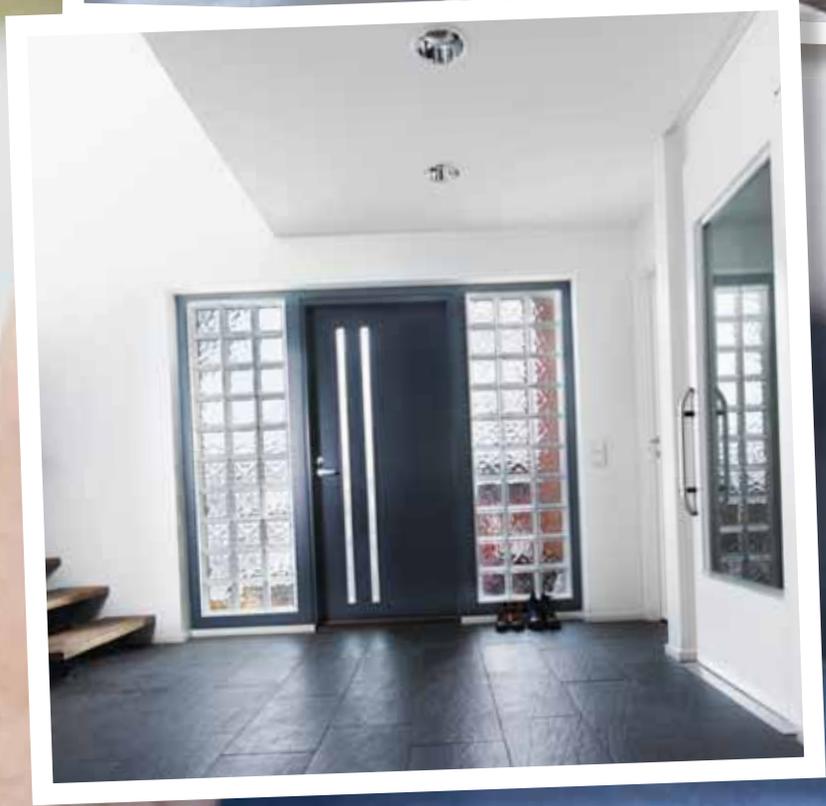

Because they're so unusual you'll find our lifts in homes all over the UK.

To understand just how ingenious our home lifts really are you need to know a little about conventional lifts. A conventional lift requires machinery space above it and a sizeable excavation beneath it. These are operations that cost money and can sometimes mean that the lift ends up in a part of the house that is far from cosy or convenient.

Our home lifts use a much smarter design – in effect a large screw that raises and lowers the lift platform. This means our lifts do not need a machinery space; they can be placed directly on the floor practically anywhere. All that's needed is a recess 50 mm deep if you want it flush with the floor. No installation could be simpler or more flexible. Or cheaper. Because no extra work is required in either new house construction or new installations. And what's more, thanks to our smart, proven design our home lifts are considerably cheaper than conventional lifts.

Beauty and comfort come at a price lower than you probably expect.

We've talked about what a home lift can mean to people, about how much less space a lift takes than you had imagined and about how much smarter our design is for the home. What we haven't talked about yet is elegance and style. Or the great freedom of choice you have in materials and appearance. But before we do, there's one important thing you need to know, because all this talk about advantages may bring you to think our home lifts are pricey. Well, they're not.

We can promise you that the great majority of our customers are pleasantly surprised when it comes to price. It's lower than you think, due to modern, efficient production, smart design and innovative engineering. This means the price tag is seldom a sticking point when deciding on a home lift, but rather the reason why so many homes get one.

Now that price is out of the way, you can take the time to ruminate on such visionary things as the environment. And then you can relax and browse through the brochure and revel in how your home lift will look.

How would you like your lift to look? Great; we'll get that done.

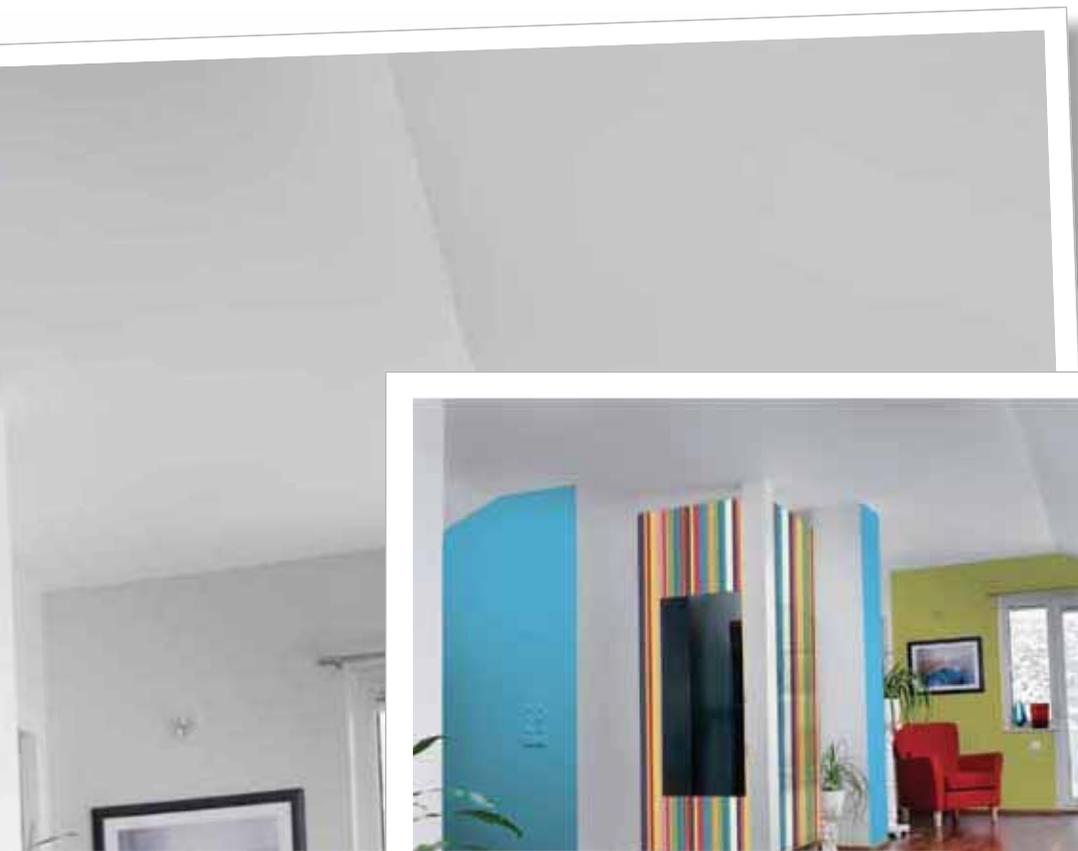

Would you like to be a designer? Because that's exactly what you have the chance to be. First select your lift model; then the colour, the lighting, flooring, different types of glass or stainless steel. Even the text on the buttons. And as if that isn't enough, you can even come up with your own suggestions for how you want your lift painted. We naturally help you find out exactly what you want. A home lift can hardly be more personalized than that.

On the other hand, if you would like to leave the appearance to us, there are plenty of standard lifts to choose from. Because at Axess 2, standard also means freedom of choice.

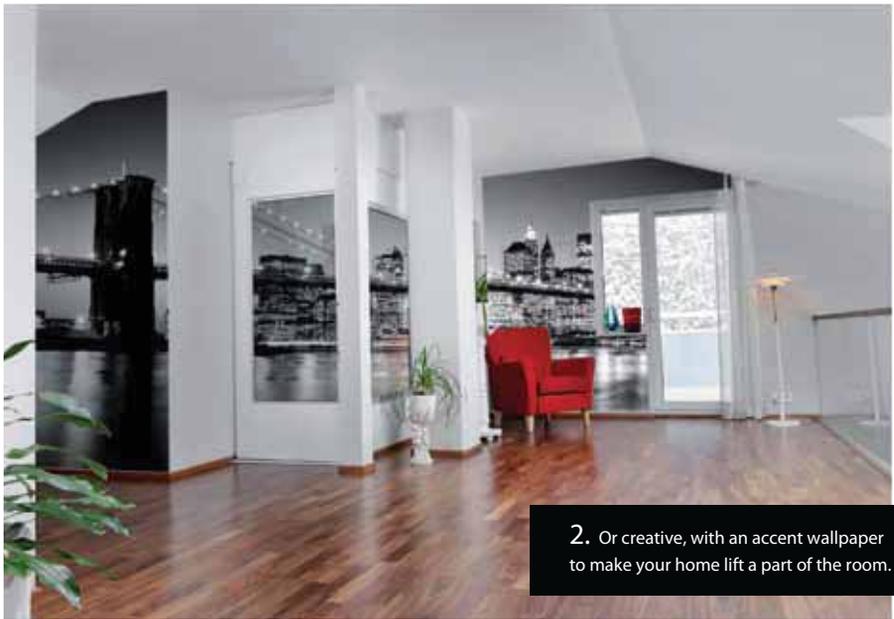

Three examples of how you can design your lift.

1. Discrete; a lift that blends into the décor.

3. Or perhaps the lift can be a focal point of colour for the entire room.

2. Or creative, with an accent wallpaper to make your home lift a part of the room.

Living Collection. Freedom of choice starts here.

We provide our Qube home lifts in three sizes. What they have in common is quality, comfort and the freedom to choose how they will look.

The Qube home lift is the smallest, most compact home lift on the market.

It is designed to meet every requirement for comfort, space and style.

It's available in different sizes to fit your own particular home.

You can choose between several different sizes, materials, glazing and colours

This is the choice for anyone wanting to express their own personal touch.

Choose between 217 colours and 9 carpets. Or your very own idea.

Maybe we've gone too far when it comes to freedom of choice. With so many possibilities it can often be difficult to decide – 217 colors for the shaft, doors, interiors and 9 different carpets. That's a lot to choose from. Exactly what you need to express your personality. And should you still not feel quite at home, you are free to choose your own personal style for your home lift.

Outside and inside: Feel free to choose any colour or appearance.

How would you like to say welcome? Try different doors and glass.

Choosing a door and glass is about expressing yourself and impressing your guests. How does it feel from the inside? How does it look from the outside? What impression do you want to create? Our range of different doors provides great opportunities for meeting your precise needs. And your taste. Combined with the right choice of glass your home lift will provide exactly the kind of welcome you want.

Glass
 Glass is available in a selection of four nuances: clear, frosted, tinted and dark tint.

Dark tint.
 Frosted.
 Tinted.
 Clear.

Door handles, hand rails and push-buttons. Choose with care and attention to detail.

When it comes to handles and handrails there's a choice of aluminium or stainless steel. But there is a great difference in how these materials are perceived, so even if it seems like just a simple choice, choose with care and attention. Once you've selected doorhandles and handrails you are almost finished creating your lift. Just one thing remains. Choosing the text above the push buttons.

Door handles, Hand rails

Choose between aluminium and stainless steel.

Panel and push buttons

Discrete buttons that allow you to choose the text above them. So start coming up with creative names for your different floors right away such as – Wine Cellar, Kitchen, Bedroom and so forth.
